

27th September 2012

Project: Westrac Facility Tomago
Works Description: Paved Hardstand
Size: 82 000m², 20 Acres or 3.3 Million units

A Class Pavers, a West Australian based company, were engaged by Abigroup to undertake the paving phase on hardstand areas at the Westrac Facility Tomago NSW in the early part of 2012. The paving aspect of the project was completed in 4 months during one of the wettest spells that New South Wales has experienced in 80 years.

The major contributing factor to the successful completion of the contracted works was due mainly to the hands on project management team skills of Tony Yelland (Director) and Ryan Daly (Contracts Manager) who both maintained a presence on site at all times. The management style implemented ensured the project ran smoothly and was completed on time, to the highest standard of workmanship with the team working the necessary hours, most periods of 7 Days per week, to complete the project on time, even with the problematic inclement weather. They were always available at short notice to meet in person and regularly communicated to forward plan and keep us well informed of progress. Throughout the project, A Class Pavers demonstrated a high level of commitment towards safety and quality of workmanship.

We are delighted to have worked with A Class Pavers as a subcontractor on this high profile project. We have no hesitation in recommending them to future clients.

Robert Lindquist
Project Manager
